

CFE COMMENTS FOR

ECON-UB.0119.001

2021 FALL

PROFESSOR MOSER

1. Please comment on the course materials - readings, handouts, PowerPoint slides, etc. Include which you found most and least useful.

- Course materials were always thorough, and most useful were Professor Moser's papers that were provided to read.
- At first I was doing all the readings but then I realized that only some parts are useful for the data labs. The presentations are interesting but sometimes a bit long
- The readings are hardcore and informative. The data lab instructions are always detailed. Probably uploading the data lab PowerPoint and making the data descriptions easier to read. Might be due to the limit of the Brightspace though.
- PowerPoints somewhat helpful, DataCamp sometimes not relevant to Lab needs.

2. Which topics and class sessions did you find most and least valuable? What other topics do you suggest the instructor include?

- I think every section was valuable in its own right, as they all contributed to making my understanding of the economics of innovation more well rounded and wider scoped.
- I liked all topics
- The course is overall informative and intriguing.
- R basics were helpful in addition to regression models.

3. Do you have any feedback for your Teaching Fellow? (if you did not have a TF, please enter "NA").

- Felipe was super helpful, couldn't ask for much better.
- Felipe was helpful but I sometimes he acted nicer in class than in his office hours
- Felipe is super nice and helpful. He always gives out a clear instruction in the data lab.
- Responsive, supportive, and thorough.

4. Do you have any other comments for your instructor or additional constructive feedback that would help improve future students' learning?

- n/a
- The coding was hard, especially at the beginning. Maybe some data labs could only be based on the readings and not so much on the code.
- Probably making the course more organized, since it seems a little bit disorganized at first. But the helpful learning environment made this matter less.
- n/a

5. Provide any comments or suggestions in the space below.

- Professor Moser was great this semester. It's clear that she is passionate about the subjects covered in class, as they are often her own work, which carries over to our learning because she explains it so well.
- I really enjoyed the Professor's presentations but I found the data labs challenging. The extra credit data lab was extremely useful to boost my grade. Overall, I really enjoyed the class :)
- The professor is smart, very academically capable, and reasonable. It's always a good experience talking to her.
- n/a
